## Product Information:

**NovaLink** - is a high performance interior/exterior joint sealant for use in both moving and non-moving joint applications. New polyether technology provides a long lasting weather tight seal to a variety of construction substrates.

**NovaLink SL** - is a self-leveling version of **NovaLink**. Applications include sealing horizontal joints such as driveways, factory floors, balconies, parking structures and many roofing applications.

**DuraLink** - is a highly elastic super adhesion moisture cure sealant. Applications include: Kynar 500® PVDF coated metals, glass, EIFS, galvanized steel and masonry. **DuraLink** may be used in many areas such as: roofs, flashings, expansion joints, windows and doors.

**M-1** - Bonds aggressively to EPDM, PVC, BUR, SBS, Mod Bit, granulated APP, FRP, metal flashing details and many other types of coated metal. **M-1** is capable of bonding steel deck to bar joists and metal sandwich panels to rod and wall purlins.

**TileSecure** - is an aggressive adhesive/sealant that bonds to many roof tiles including clay, composite, concrete and slate tiles.
