

# Universal Construction Adhesive **MEANGREEN™**

***The only construction adhesive you'll ever need!***

The world has changed! Adhesives are used in every phase of construction and material suppliers are now required to carry a large and complicated inventory of highly specialized cartridges, that consume valuable shelf space and tie up cash.

***Not any more!***

Now you don't have to stock four or five adhesives to do one basic job.

Now you don't have to use adhesives that contain flammable solvents, toxic chemicals or materials known to cause cancer.

Pick up one of your solvent based adhesive cartridges and read the safety warnings, written in fine print! The receipt for that product will have your name on it. Why assume any liability for glue? Customers don't have to shell out a ton of money to get good performance and eliminate callbacks.

**You don't have to pay more to go first class!**

With **Mean Green**, you don't have to worry about health, safety, performance and the environment.

**Mean Green** won't explode or burn.

**Mean Green** won't shrink and won't stink.

For years solvent based adhesive producers have claimed that the technology doesn't exist to make safe, high performance adhesives.

**Chem Link** has developed the technology to change all this.

**Mean Green** is the answer and it's here **now!**

**Mean Green** available in 12 pack cartons

**Chem Link**

353 East Lyons, Schoolcraft, MI 49087 800-826-1681 [www.chemlinkinc.com](http://www.chemlinkinc.com)

**Uses:**
